

DURATAC Non-DRIP OILS – TACKIFIED LUBRICANT

Introduction

Petro-Canada Duratac Non-Drip Oils are high quality, general purpose lubricants that are formulated with a tackiness additive that adheres strongly to metal surfaces. They are ideal lubricants for use where oil control is required.

Features and Benefits

- **Tacky adhesive properties**
 - Adheres well to metal surfaces
 - Provides rust and oxidation protection
 - Minimizes spattering
 - Reduces oil consumption
 - Anti-wear properties

Applications

Duratac Non-Drip Oils are designed to help minimize dripping. This reduces the chance of the lubricant coming into contact with other process materials. Therefore, Duratac Non-Drip Oils are recommended for the lubrication of systems that require an adhesive oil with good thin film foaming properties. They are ideal for use in textile mills, printing shops, saw mills and for chain saw bars and conveyor chains where their tackiness can provide protection from staining the product being processed.

Non-Drip 150 could be used for auto-body undercoating. However, due to their tacky nature, they are not recommended for use in drip-feed oilers.

What is the HT difference?

Petro-Canada starts with the patented HT purity process to produce water-white, 99.9% pure base oils. The result is a range of lubricants, specialty fluids and greases that deliver maximum performance for our customers.

Typical Performance Data

PROPERTY	TEST METHOD	DURATAC NON-DRIP OILS				
		32	68	100	150	220
Viscosity cSt @ 40°C cSt @ 100°C SUS @ 100°F SUS @ 210°F	D445	29	69	105	155	220
		6.0	10.3	13.1	17.4	21.2
		137	320	487	718	1019
		46	60	71	88	103
Viscosity Index	D2270	159	135	121	123	114
Flash Point °C/°F	D92	204 / 339	220 / 428	256 / 493	255 / 491	265 / 509
Pour Point °C/°F	D97	-39 / -38	-27 / -17	-27 / -17	-27 / -17	-24 / -11

The values quoted above are typical of normal production. They do not constitute a specification.
